

# Competitors may call it overkill, you'll call it perfect.

## INTRODUCING THE NEW SUPER BRAIN 989 AC/DC CHARGER

Charge and discharge  
1-8 cell lithium and 1-25  
cell NiCd/NiMH at up to  
a blistering 10 amps\*.  
Handles lead acid and  
gel cell as well. Also  
functions as a 1-30 volt  
digital power supply.

Includes a separate,  
heavy duty 10 amp  
AC power supply.

*Super Brain Chargers  
Feature Patented  
Technology. Additional  
patents applied for.*

Delivers sophisticated  
charging technology  
with a user-friendly,  
intuitive interface. No  
complex flow charts, no  
convoluted programming.  
It's easy to use.

### Fast, versatile and easy to use, the Super Brain 989 does it all for the flier

The 989 allows you to take advantage of high voltage, high current packs to squeeze optimum performance from power thirsty models... while its separate 10 amp AC power supply comes in handy at the shop. And if you're a flier converting to Li-Po batteries and brushless motors, the versatile 989 is your ticket to fly. From indoor micros to outdoor giant scale, if you

have a battery, the Super Brain 989 has your charge. And for convenience, it can store up to 24-battery profiles and offers battery temperature sensing and control capabilities. The Super Brain 989 is a cutting-edge charger no flier should be without. Get the details about Super Brain 989 at [www.modelrectifier.com](http://www.modelrectifier.com)

*\*Depending on the type and number of cells.*
