

# THE SOUNDS OF REAL LIFE

## city & country

### MRC'S CITY & COUNTRY SOUND STATION... 18 real

life, digital, city & country sounds. Complete with two speakers, handheld controller and power supply. Plug into standard AC outlet, turn on the power and you're ready to go.

Also available: **SOUND STATION 312...** 18 railroad sounds.

### Add life to your railroad

There's nothing like sound to add another dimension of pleasure to model railroading. And while the whistle, bell, steam chuff and diesel horn are the sounds of the railroad...MRC's new City and Country Sound Station brings you the sounds of real life.

Create your own scenarios as your train rolls past woodlands, farms and city scenes. Select from 6 sounds that play continuously and from 12 that can be added intermittently on top of them.

### Select, combine and move sounds from speaker-to-speaker

Your handheld can take you from the city's clamor to country quiet where crickets chirp, streams rush, and farm sounds fill the air. With one speaker in your city and one in the country, move sounds from-speaker-to-speaker. Combine different sounds for sound-on-sound realism. Or send rain for instance, to play simultaneously and constantly on both speakers while you weave in other sounds to enhance your layout's reality.

**Constant sounds:** INSECTS • FOREST • TRAFFIC • STREAM • RAIN • WIND

**Sound-on-sound enjoyment:** ROOSTER • HORSE • JACK HAMMER  
 • DOG • BELL (TOWN HALL) • SIREN (Emergency Vehicle) • CHICKEN  
 • THUNDER • HORN (CAR) • COW • CRICKETS • CRASH (Car Crash)
