

MRC Sound Station 312

Congratulations! You have just purchased one of the most advanced digital model railroad sound systems available today. The MRC Sound Station 312 will bring you model railroading to life with 18 realistic model railroading sounds. The 18 sounds are divided into two independent groups; a top and a bottom group. Each group contains 9 sounds and its own speaker.

Top group:

1. Diesel Horn 1 Long
2. Diesel Horn 1 Short
3. Diesel Horn 1 Combination
4. Diesel Horn 2 Long
5. Diesel Horn 2 Short
6. Diesel Horn 2 Combination
7. Whistle 1 Long
8. Whistle 1 Short
9. Conductor

Bottom group:

10. Whistle 2 Combination
11. brake Sound
12. Steam Release
13. Coupling Sound
14. Engine Bell
15. Crossing Gate Bell
16. Rail Clack Sound
17. Steam Chuff
18. Diesel Engine Noise

Operational Information:

1. All sound associated with push buttons can be re-triggered. You can repeat the same sound before the sound ends to make the sound longer. Otherwise you can start a new sound to cut the current sound.
2. You can play one sound from each group at the same time.
3. Bottom group sounds have a volume control. You can adjust the volume to emulate sound approaching or fading away.
4. Only one sound slide switch can be turned on (right side position) at one time. The unit may not operate properly if more than one slide switch is turned on.

For further enjoyment: Two sound station 312 working together will give you more realistic sound combinations. For example, you can have the bell sound approaching and apply the brake sound at the same time.

Return Procedure: If it should be necessary to return your Sound Station 312 for service, please include a letter with your name and address printed clearly, a daytime telephone number, and a detailed description of the problem you are experiencing.
